INTRODUCTION

The annual inventory of carpool parking activity was conducted in November and December. The inventory surveyed parking areas for the following: signs, facilities, and vehicle counts.

RESULTS

TOTAL NUMBER OF OFFICIAL MINISTRY PARKING LOTS: 47

TOTAL NUMBER OF PARKING SPACES: 2917

TOTAL NUMBER OF VEHICLES PARKED: 1679

AVERAGE OVERALL OCCUPANCY: 58%

In the year since the last inventory, MTO opened one new carpool parking lot and made improvements to several other lots. The total number of parking spaces increased by 3.1%, however the number of vehicles parked did not change significantly and overall lot occupancy dropped slightly to 58%. Fourteen lots had an occupancy rate of 70 % or more. Three lots were at or near full capacity at the time of the survey: Lot 13C at the junction of Highway 400 & Innisfil Beach Road, lot 10C near Highway 400 and Highway 9, and lot 3C at Highway 401 & Highway 10.

As part of the inventory, many other sites were checked for carpool parking activity. Twenty sites with carpool activity are identified in the inventory. A total of 209 vehicles were parked at these sites.

One carpool lot established by the municipality of Sutton was surveyed.

BENEFITS**

The 1679 vehicles parked in official ministry parking lots:

SAVE ENERGY - 4,873,000 L of gasoline annually.

REDUCE CONGESTION - reduced annual vehicle kilometres travelled by 39,624,000 (during the peak hours).

IMPROVE SAFETY - around intersections; vehicles are no longer parked along interchange ramps.

These figures represent only the savings generated by daytime users of the parking lots during a normal work week. Further savings are generated by the many weekend and evening users of the lots, who carpool perhaps for shopping or recreational purposes.

The 2917 parking spaces provide a safe, convenient and highly visible service to the public.

**Assumptions
- Average distance from lot to work: 47.2 km. Taken from TEMP report SAR-81-02, Carpool Parking in the Toronto Commutershed (based on a 1979 survey)

- Fuel efficiency of vehicles: 12.3 L/100 km. Based on Statistics Canada 1986 Fuel Economy Survey.

- 250 working days per year.

SUMMARY OF OFFICIAL MINISTRY PARKING LOTS
